**The Rise and Fall of Culture History** R. Lee Lyman, Michael J. O'Brien, Robert C. Dunnell

Over forty years ago Gordon R. Willey (1953b:361) stated that "[t]he objectives of archeology ...are approached by the study and manipulation of three basic factors: form, space, and time." A few years later, Albert C. Spaulding (1960b:439) repeated this thought using different words: "[A]rchaology can be defined minimally as the study of the interrelation- ship of form, temporal locus, and spatial locus exhibited by artifacts. In other words, archaeologists are always concerned with these interrelation- ships, whatever broader interests they may have, and these interrelation- ships are the special business of archaeology." Many of the means Americanist archaeologists use to examine formal variation in artifacts and the distribution of that variation across space and through time were formulated early in the twentieth century. The analytical tenets, or principles, underlying the various methods and techniques were formalized and axiomatized in later years such that by the 1930s they constituted the first formal paradigm for Americanist archaeology-a paradigm commonly termed culture history. This paradigm began with a very specific goal-to document the history of the development of prehistoric cultures in the Americas. Although it fell from favor in the 1960s, many of its central tenets were carried over to newer paradigms and thus continue to be fundamental within Americanist archaeology. With Willey's and Spaulding's conceptions as our guide, we elsewhere reprinted (Lyman et al.
