Guidelines for the Assessment and Planning of Estuarine Barrages Neville Burt, Andy Rees

Based on research commissioned by DETR and the Environment Agency, Guidelines for the assessment and planning of estuarine barrages presents guidance on the planning, design, construction and operation of estuarine barrages. The development and operation of barrages have the potential to have a considerable impact on the existing estuarine environment. It is essential therefore that all environmental costs are taken into account and that alternative options that may satisfy the aspirations of the developer are fully considered.
