Practical Handbook for Beet-Sugar Chemists: Rapid Methods of Technico-Chemical Analyses of the Products, and by-Products and of Material Used in the Manufacture of Beet Sugar (Classic Reprint)

Werner Moeller-Krause

Excerpt from Practical Handbook for Beet-Sugar Chemists: Rapid Methods of Technico-Chemical Analyses of the Products, and by-Products and of Material Used in the Manufacture of Beet Sugar

The author does not claim of this handbook to contain heretofore unknown theories and methods, but has endeavored to condense the selected practical information obtained from standard works and other sources, to a small, convenient form.

It is evident that the manufacturing process, the chemistry of the various sugars and the polariscope could not be discussed exhaustively within the limits of a mere handbook, but the short outlines given will doubtless prove profitable to beginners.

The author takes this opportunity to thank Mr. Geo. M. Bradford for the complete revision of the manuscript, also Messrs. Eimer & Amend of New York for the loan of some of their electrotypes.

About the Publisher

Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at www.forgottenbooks.com

This book is a reproduction of an important historical work. Forgotten Books uses state-of-the-art technology to digitally reconstruct the work, preserving the original format whilst repairing imperfections present in the aged copy. In rare cases, an imperfection in the original, such as a blemish or missing page, may be replicated in our edition. We do, however, repair the vast majority of imperfections successfully; any imperfections that remain are intentionally left to preserve the state of such historical works.
