James Mitchell

THE CRAFT OF MODULAR POST & BEAM: Building Log & Timber Homes Affordably James Mitchell

Discusses the elements involved in building log homes, including design, wood, tools, joinery, and hewing methods. Beautiful black and white line drawings of timber frame and log houses make this book fun to read. With a little bit of history, a touch of technique, some design, and even some sprinklings of philosophy, James Mitchell presents a fresh perspective on timber frame and log house construction. Working with heavy framing members is the key ingredient of this book - and it is mixed with artistic renderings of beautiful details. About half of the book is devoted to timber framing, and half is all about log homes. There is also a fair amount of discussion and illustration of more general construction and finish details.
