Alexey Piskarev, Mikhail Shkatov

Energy Potential of the Russian Arctic Seas, Volume 58: Choice of development strategy (Developments in Petroleum Science) Alexey Piskarev, Mikhail Shkatov

The structure of sedimentary basins of the Russian Arctic Seas is studied and illustrated by a number of maps, cross-sections and geophysical models. The calculated density models of the Earth crust illustrate the deep structure of the main blocks of the crust. Five major gas-condensate and gas fields are discovered here: three (Shtokman, Ludlov, Ledovoe) in the Barents and two (Leningrad and Rusanov) in the Kara Sea.

Geological and geophysical characteristics of the Russian Arctic Sea sedimentary basins allow an estimation of their hydrocarbon potential by comparison with the known world analogues.

Total potential resources of giant deposits of hydrocarbons in Russian Arctic Seas are estimated at 470 billion barrels of oil equivalent. The richest resources are the Kara Sea and Laptev Sea. Less rich is Barents Sea. The relatively smaller contribution to the overall estimation of the resources makes the resources of East-Siberian Sea and Chukchi Sea.

Development the energy capacity of the continental shelf of Russia can play a stabilizing role in the dynamics of oil and gas production in the period 2010-2020. A key role in developing the capacity of the Arctic shelf oil and gas play is the innovative technology in exploration, production and management of the relevant investment projects. World offshore experience indicates that the combination of these factors is achieved through the formation of international firms and organizations.

- Comprehensively assesses the potential oil and gas resources in sedimentary basins within the Russian sector of the Arctic Ocean
- Describes the economic and legal challenges to the development of offshore fields in Russia
- Explores possible ways and timing to make these hydrocarbon resources available to the global market

From reader reviews:

Brad Black:

In this 21st centuries, people become competitive in each and every way. By being competitive currently, people have do something to make them survives, being in the middle of the crowded place and notice by simply surrounding. One thing that occasionally many people have underestimated that for a while is reading. That's why, by reading a publication your ability to survive improve then having chance to stand up than other is high. For yourself who want to start reading some sort of book, we give you this particular Energy Potential of the Russian Arctic Seas, Volume 58: Choice of development strategy (Developments in Petroleum Science) book as basic and daily reading publication. Why, because this book is more than just a book.

Herman Ovalle:

The particular book Energy Potential of the Russian Arctic Seas, Volume 58: Choice of development strategy (Developments in Petroleum Science) will bring one to the new experience of reading a new book. The author style to elucidate the idea is very unique. In the event you try to find new book to learn, this book very ideal to you. The book Energy Potential of the Russian Arctic Seas, Volume 58: Choice of development strategy (Developments in Petroleum Science) is much recommended to you you just read. You can also get the e-book from official web site, so you can more easily to read the book.

Terry White:

The e-book untitled Energy Potential of the Russian Arctic Seas, Volume 58: Choice of development strategy (Developments in Petroleum Science) is the guide that recommended to you to read. You can see the quality of the reserve content that will be shown to an individual. The language that author use to explained their way of doing something is easily to understand. The writer was did a lot of research when write the book, and so the information that they share to you personally is absolutely accurate. You also will get the e-book of Energy Potential of the Russian Arctic Seas, Volume 58: Choice of development strategy (Developments in Petroleum Science) from the publisher to make you a lot more enjoy free time.

Randy Johnson:

Are you kind of busy person, only have 10 or perhaps 15 minute in your day time to upgrading your mind ability or thinking skill also analytical thinking? Then you are having problem with the book than can satisfy your limited time to read it because all this time you only find e-book that need more time to be read. Energy Potential of the Russian Arctic Seas, Volume 58: Choice of development strategy (Developments in Petroleum Science) can be your answer mainly because it can be read by an individual who have those short extra time problems.
