Differential Forms and Applications (Universitext)

Manfredo P. Do Carmo

Differential Forms and Applications (Universitext) Manfredo P. Do Carmo
An application of differential forms for the study of some local and global aspects of the differential geometry of surfaces. Differential forms are introduced in a simple way that will make them attractive to "users" of mathematics. A brief and elementary introduction to differentiable manifolds is given so that the main theorem, namely Stokes' theorem, can be presented in its natural setting. The applications consist in developing the method of moving frames expounded by E. Cartan to study the local differential geometry of immersed surfaces in R3 as well as the intrinsic geometry of surfaces. This is then collated in the last chapter to present Chern's proof of the Gauss-Bonnet theorem for compact surfaces.

From reader reviews:

Arturo McDaniel:

Do you have favorite book? If you have, what is your favorite's book? Reserve is very important thing for us to learn everything in the world. Each guide has different aim or even goal; it means that publication has different type. Some people truly feel enjoy to spend their time to read a book. They may be reading whatever they take because their hobby is actually reading a book. What about the person who don't like looking at a book? Sometime, man feel need book when they found difficult problem as well as exercise. Well, probably you'll have this Differential Forms and Applications (Universitext).

Jane Kim:

Have you spare time for just a day? What do you do when you have considerably more or little spare time? Yeah, you can choose the suitable activity for spend your time. Any person spent their spare time to take a stroll, shopping, or went to the actual Mall. How about open or read a book eligible Differential Forms and Applications (Universitext)? Maybe it is being best activity for you. You already know beside you can spend your time using your favorite's book, you can more intelligent than before. Do you agree with it is opinion or you have additional opinion?

Nichelle Shive:

What do you consider book? It is just for students because they're still students or that for all people in the world, what the best subject for that? Just simply you can be answered for that issue above. Every person has distinct personality and hobby per other. Don't to be obligated someone or something that they don't wish do that. You must know how great and also important the book Differential Forms and Applications (Universitext). All type of book is it possible to see on many sources. You can look for the internet resources or other social media.

Joseph Felder:

Do you considered one of people who can't read satisfying if the sentence chained inside straightway, hold on guys this specific aren't like that. This Differential Forms and Applications (Universitext) book is readable through you who hate those straight word style. You will find the info here are arrange for enjoyable looking at experience without leaving even decrease the knowledge that want to deliver to you. The writer of Differential Forms and Applications (Universitext) content conveys thinking easily to understand by a lot of people. The printed and e-book are not different in the written content but it just different in the form of it. So , do you nonetheless thinking Differential Forms and Applications (Universitext) is not loveable to be your top listing reading book?
