The Fellowship of Being: An Essay on the Concept of Person in the Philosophy of Gabriel Marcel John B. O'Malley

This book is the fruit of a critical inquiry into the nature and scope of Marcel's philosophic achievement. As such, it is concerned less with affixing the appropriate label (personalist or existentialist) to Marcel's thought -and with it making it stick - than with discovering the precise impulse and tenor of his philosophy. In the process of that more general inquiry, the writer found being forced upon him a central concept as integrating focus of Marcel's philosophic investigations. This concept was that of the person. Gradually it emerged as a concept not only of prime importance for understanding the underlying harmony that pervades Marcel's professedly unsystematic researches, but equally as one of profound significance for any philosophy that pretends adequately to account for human experience. Furthermore, it seemed that the concept derived much of that significance from its acceptance precisely in the context of Marcel's thought. This feature of Marcel's philosophic writings alone is warrant enough for overcoming any initial embarrassment aroused in Anglo-Saxon breasts by his style. For, to speak candidly, that style is of a generation and a climate whose tastes little accord with palates trained to a greater astringency. Nor will Marcel's evident and unashamed concern with life and its problems necessarily evoke a warm response in minds accustomed to operate in an atmosphere of stricter and more academic reserve.
