Green Organic Chemistry in Lecture and Laboratory (Sustainability: Contributions through Science and Technology)

Green Organic Chemistry in Lecture and Laboratory (Sustainability: Contributions through Science and Technology)

The last decade has seen a huge interest in green organic chemistry, particularly as chemical educators look to "green" their undergraduate curricula. Detailing published laboratory experiments and proven case studies, this book discusses concrete examples of green organic chemistry teaching approaches from both lecture/seminar and practical perspectives. The experienced contributors address such topics as the elimination of solvents in the organic laboratory, organic reactions under aqueous conditions, organic reactions in non-aqueous media, greener organic reagents, waste management/recycling strategies, and microwave technology as a greener heating tool. This reference allows instructors to directly incorporate material presented in the text into their courses.

Encouraging a stimulating organic chemistry experience, the text emphasizes the need for undergraduate education to:

- Focus on teaching sustainability principles throughout the curriculum
- Be flexible in the teaching of green chemistry, from modification of an existing laboratory experiment to development of a brand-new course
- Reflect modern green research areas such as microwave reactivity, alternative reaction solvents, solvent-free chemistry, environmentally friendly reagents, and waste disposal
- Train students in the "green chemistry decision-making" process

Integrating recent research advances in green chemistry research and the Twelve Principles of Organic Chemistry into the lecture and laboratory environments, **Green Organic Chemistry in Lecture and Laboratory** highlights smaller, more cost-effective experiments with minimized waste disposal and reduced reaction times. This approach develops a fascinating and relevant undergraduate organic laboratory experience while focusing on real-world applications and problem-solving.

From reader reviews:

Sam Holmes:

Why don't make it to be your habit? Right now, try to ready your time to do the important act, like looking for your favorite reserve and reading a reserve. Beside you can solve your long lasting problem; you can add your knowledge by the publication entitled Green Organic Chemistry in Lecture and Laboratory (Sustainability: Contributions through Science and Technology). Try to make book Green Organic Chemistry in Lecture and Laboratory (Sustainability: Contributions through Science and Technology) as your pal. It means that it can to be your friend when you feel alone and beside regarding course make you smarter than before. Yeah, it is very fortunated for yourself. The book makes you much more confidence because you can know almost everything by the book. So , we need to make new experience and knowledge with this book.

Mamie Esters:

Reading a book can be one of a lot of exercise that everyone in the world enjoys. Do you like reading book therefore. There are a lot of reasons why people enjoy it. First reading a e-book will give you a lot of new information. When you read a publication you will get new information simply because book is one of many ways to share the information or even their idea. Second, looking at a book will make a person more imaginative. When you looking at a book especially tale fantasy book the author will bring you to imagine the story how the characters do it anything. Third, you may share your knowledge to others. When you read this Green Organic Chemistry in Lecture and Laboratory (Sustainability: Contributions through Science and Technology), you may tells your family, friends in addition to soon about yours guide. Your knowledge can inspire others, make them reading a book.

Jason Faria:

Reading a e-book tends to be new life style on this era globalization. With reading through you can get a lot of information that may give you benefit in your life. Along with book everyone in this world could share their idea. Ebooks can also inspire a lot of people. Many author can inspire their reader with their story or their experience. Not only the storyline that share in the guides. But also they write about the knowledge about something that you need illustration. How to get the good score toefl, or how to teach children, there are many kinds of book which exist now. The authors in this world always try to improve their skill in writing, they also doing some investigation before they write on their book. One of them is this Green Organic Chemistry in Lecture and Laboratory (Sustainability: Contributions through Science and Technology).

Matthew Hansen:

Many people spending their period by playing outside using friends, fun activity having family or just watching TV all day every day. You can have new activity to invest your whole day by studying a book.

Ugh, do you think reading a book can actually hard because you have to bring the book everywhere? It ok you can have the e-book, bringing everywhere you want in your Smart phone. Like Green Organic Chemistry in Lecture and Laboratory (Sustainability: Contributions through Science and Technology) which is getting the e-book version. So , try out this book? Let's find.

Download and Read Online Green Organic Chemistry in Lecture and Laboratory (Sustainability: Contributions through Science and Technology) #O68E95MBDI0

Read Green Organic Chemistry in Lecture and Laboratory (Sustainability: Contributions through Science and Technology) for online ebook

Green Organic Chemistry in Lecture and Laboratory (Sustainability: Contributions through Science and Technology) Free PDF download, audio books, books to read, good books to read, cheap books, good books, online books, books online, book reviews epub, read books online, books to read online, online library, greatbooks to read, PDF best books to read, top books to read Green Organic Chemistry in Lecture and Laboratory (Sustainability: Contributions through Science and Technology) books to read online.
