Computing: A Historical and Technical Perspective Yoshihide Igarashi, Tom Altman, Mariko Funada, Barbara Kamiyama

Exploring a vast array of topics related to computation, **Computing: A Historical and Technical Perspective** covers the historical and technical foundation of ancient and modern-day computing. The book starts with the earliest references to counting by humans, introduces various number systems, and discusses mathematics in early civilizations. It guides readers all the way through the latest advances in computer science, such as the design and analysis of computer algorithms.

Through historical accounts, brief technical explanations, and examples, the book answers a host of questions, including:

- *Why do humans count differently from the way current electronic computers do?*
- *Why are there 24 hours in a day, 60 minutes in an hour, etc.?*
- *Who invented numbers, when were they invented, and why are there different kinds?*
- *How do secret writings and cryptography date back to ancient civilizations?*

Innumerable individuals from many cultures have contributed their talents and creativity to formulate what has become our mathematical and computing heritage. By bringing together the historical and technical aspects of computing, this book enables readers to gain a deep appreciation of the long evolutionary processes of the field developed over thousands of years. Suitable as a supplement in undergraduate courses, it provides a self-contained historical reference source for anyone interested in this important and evolving field.

From reader reviews:

Ruth Irizarry:

As people who live in often the modest era should be change about what going on or info even knowledge to make these people keep up with the era which can be always change and progress. Some of you maybe will update themselves by examining books. It is a good choice to suit your needs but the problems coming to a person is you don't know which you should start with. This Computing: A Historical and Technical Perspective is our recommendation to help you keep up with the world. Why, because this book serves what you want and wish in this era.

Eric Bass:

Do you among people who can't read satisfying if the sentence chained within the straightway, hold on guys this aren't like that. This Computing: A Historical and Technical Perspective book is readable simply by you who hate those perfect word style. You will find the facts here are arrange for enjoyable reading experience without leaving actually decrease the knowledge that want to provide to you. The writer of Computing: A Historical and Technical Perspective content conveys the thought easily to understand by lots of people. The printed and e-book are not different in the content material but it just different by means of it. So , do you continue to thinking Computing: A Historical and Technical Perspective is not loveable to be your top list reading book?

James Anderson:

The book Computing: A Historical and Technical Perspective has a lot of knowledge on it. So when you check out this book you can get a lot of advantage. The book was written by the very famous author. Tom makes some research prior to write this book. This kind of book very easy to read you may get the point easily after looking over this book.

Pamela Jernigan:

Reading can called thoughts hangout, why? Because if you find yourself reading a book specially book entitled Computing: A Historical and Technical Perspective your brain will drift away trough every dimension, wandering in most aspect that maybe unknown for but surely will end up your mind friends. Imaging each and every word written in a guide then become one contact form conclusion and explanation which maybe you never get prior to. The Computing: A Historical and Technical Perspective giving you a different experience more than blown away your mind but also giving you useful information for your better life with this era. So now let us explain to you the relaxing pattern here is your body and mind will probably be pleased when you are finished reading it, like winning a casino game. Do you want to try this extraordinary investing spare time activity?
