Everything you know about what leads to a person's high achievement is misleading. The traditional view of success that individuals like Bill Gates or sports stars rise up through individual tenacity and innate talent is only part of the tale, claims Gladwell. In *Outliers* he brings to your attention information that will make you question everything you ever assumed about successful men and women. For instance, the fact that most pro hockey players were born in the months of January, February, and March. Actually, not "most," but nearly all of them. Gladwell shows that it was not merely merit that led to their phenomenal success. He will alter your view of intelligence as well as the amount of work it truly takes to become an outlier. In the typical Gladwell method, he will provide a series of fascinating stories that will slowly unveil a new Story of Success.
